

What's New in GideonSoft 2021 Release 2

We're proud to announce the latest release of GideonSoft! Along with performance enhancements and bug fixes, we've added some exciting new designs, changes, and features.

Better "People Skills"

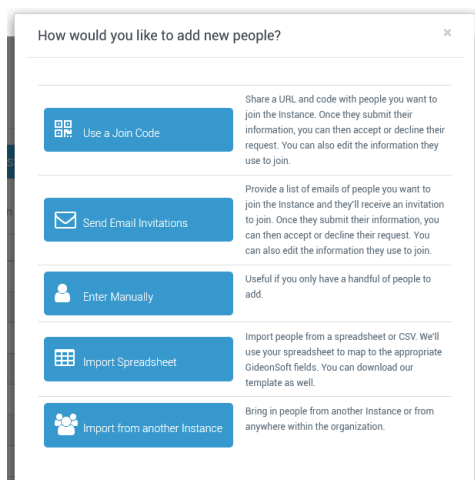

We listened to your feedback, and made it much easier to add and manage people in GideonSoft! You don't want to have to learn yet *another* app. You want to just jump in and get things done. So ...

Change

Adding people is quicker and easier ... We've added 2 new ways to efficiently get people in your system: use a Join code or send Email Invites. Review and approve the responses and away you go! As always, you can still add one at a time, import existing people or use a spreadsheet for larger lists of people.

Design

Managing people is easier and more flexible ... With an updated People page, there's more info and actions available, and you can pick and choose which columns to view.

New ways to get people started in GideonSoft!

A Whole New Kind of Module

We've given your assessment a whole new purpose! ... You've used GideonSoft for assessing performance and developing your roster, team or staff. Now, you can use GideonSoft for recruiting new people to determine whether they'd be a good fit, using a Persistent Module ...

Change

When you have a lot of people but fewer data points ... With no end dates and no Instances, the Persistent Module is designed to handle a large number of people. Instead, just Categorize them as needed.

Feature

Yes, Categories ... Great for neatly organizing and filtering, people can be assigned to a Category (or no Category).

Feature

Focus your Data ... With 26 built-in fields and the ability to add Custom fields, you can define what data you need each person's "card" to contain.

Feature

Add and Share Notes ... You and your team of assessors can quickly leave notes in an organized manner for each and every person in the Module. Then group notes however you like, and share them as needed.

Feature

Upload and Share Files ... Just like Notes, you can store a transcript, photo or other attachments for a person, and then share with other assessors (or not!).

Design

Easily highlight people for quick reference ... Apply formatting rules to color-code people, or add them to your watch list!

And we're just getting started ... We have big plans for collecting and reporting data on all these people. Stay tuned!

The screenshot displays the GideonSoft software interface. At the top, there's a navigation bar with 'Class of 2022', 'Filter by status', 'Advanced Filter', and 'Show'. Below this is a table with columns: Category, First Name, Last Name, Status, Primary Email, Primary Phone, Gender, Address1, Address2, City, State, Zip. A row is highlighted for 'Class of 2022', 'Nicholas', 'Alvarez', 'Evaluating', 'nicolv54@email.com', '(555) 555-5555', '123 Main Street', 'Centerville', 'IL', '12345'. Below the table, there's a 'Details for Nicholas Alvarez' section with tabs for 'Details', 'Status History', 'Notes', and 'Attachments'. The 'Details' tab is active, showing a form with fields for Name (First Name: Nicholas, Last Name: Alvarez, Middle Name, Nick Name, Prefix, Suffix), Location (Address1: 123 Main Street, Address2, City: Centerville, State: IL, Zip: 12345, School), Contact (Primary Email: nicolv54@email.com, Secondary Email, Primary Phone: +1 (555) 555-5555, Secondary Phone), and Social Media (Facebook, Twitter, Instagram). At the bottom, there's a pagination bar showing '10 25 50 100' and 'Page 1 of 1 (36 items)'.

Persistent People are the best kind!

Reporting Improvements

In our continuing pursuit of reporting perfection ... We've added more bells, whistles and functionality for all!

Change

We've added polish to our Popups ... Printing and exporting output now includes the header.

Feature

Scripted Decision Trees ... Now report designers have the ability to script their own Decision Tree visualizations.

Feature

Export to Excel ... Detail Data Grids can now display an icon at the top right to export to Excel.

Timestamp	Event	Behavior/Action	Value	Subject	Observer	Comment

That little Export to Excel icon in the top right can make a big difference!

Miscellaneous Goodness

Change

More Dashboards ... We removed the 10 page limit, so you can set up as many as you need.

Change

Add an image to a Survey ... Now you can simply add a photo or chart, and then ask questions about it.
