

What's New in GideonSoft 2020 Release 1

We're happy to introduce the latest GideonSoft release. Along with the performance enhancements and various bug fixes, we have added new exciting designs, changes, and features. The following lists the highlights:

Goal Setting 2.0

Design

New Goal Worksheet ... It's now easy to create and manage your goals. Quickly set up goals, commitments and completion dates to build your own individual development plan!

Change

Reminders ... Receive daily or weekly notices at a specified time to help keep you on track!

Change

Download Worksheet ... Save to PDF or print your plan for offline reference.

Change

Commitments ... What steps will you commit to taking to accomplish your goal?

Feature

Send to your Supervisor ... For their review, visibility and feedback.

My Goal Plan
Completion Date: [08/27/2020](#)

Plan Details

- 🗑️ [Add 15 pounds of muscle](#) ✎️
- ✓ [Lift heavy \(Weekly\)](#) ✎️
- ✓ [Light Cardio \(Weekly\)](#) ✎️
- ✓ [Stretching \(Daily\)](#) ✎️
- ✓ [Eat enough Protein \(1g/lb/day\) \(Daily\)](#) ✎️
- + Add Commitment
- + Add New Goal

The new Goal Worksheet makes it easy to set and manage goals!

Survey Enhancements

Design

Kiosk Mode ... Activate a full screen layout with no other menus or options. Let each team member quickly enter their last set in the weight room!

Design

Redesigned web UI ... Completing a survey will look and feel the same in the web or mobile app.

Change

Expanded Branching ... Now questions can be displayed or hidden based upon other responses, using the new Visibility settings. This builds on previous role-based branching capability.

Change

Forward Only ... Hide the back button! Useful for quizzes; prevents going back to change answers (or sharing with others).

Feature

Anonymous Surveys ... Create a shareable link and solicit responses from people who do not have a GideonSoft account. The responder needs to provide an email (and a password if you like), and you can also set an expiration.

Feature

Rating Question Summaries ... Display an average of a series of ratings in real time. Since that average may not tell the whole story, we've included an option to allow the rater to override it. You can also require an explanation for the override rating. GideonSoft will capture all these data points for even more comprehensive analysis!

Demo Survey #5 [PREVIEW]

How much do you enjoy each season?

	Not at all	A little	A Lot
Fall	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
Summer	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Spring	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>

2.3 ↓

1.6

Fall is one of the best seasons.

The new ratings question summary feature at work!

Report Design and Analytics

Design

Band Report Redesign ... Now functions as a voting tool! Select people, data points and green/gray/red bands, apply votes and comments, and review the summary.

Change

Stacked Bars ... The Bar Chart item now has an option to display stacked bars, as values or as a percentage.

Change

Rank Data ... We added Ranks as a new data source for Detail Data Grid, Pivot Grid and Text items. (It's now also available in Data Export)

Feature

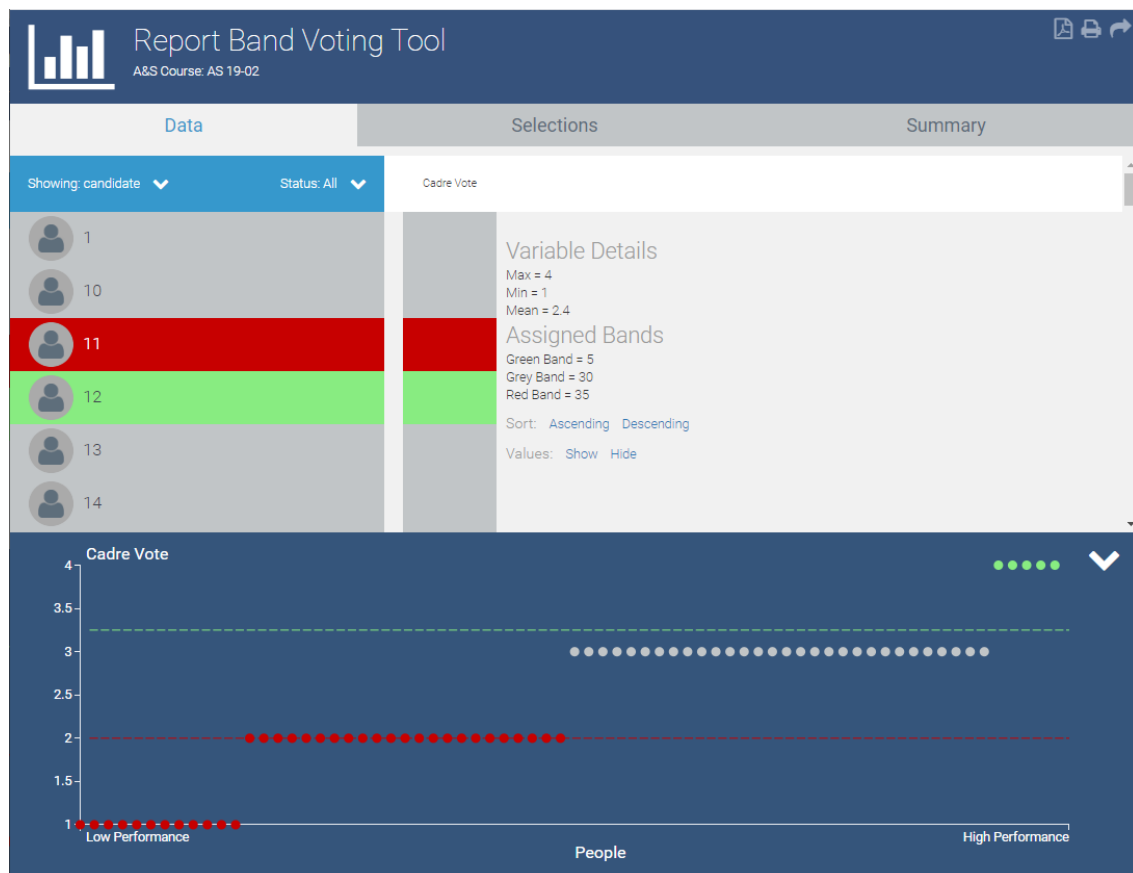

More Text Widget Options ... Now it can display a data point on the fly, and use conditional formatting, just like Detail Data Grids.

Feature

Report Activity ... See what reports are being used. Report generation is now logged and a QA report is available at the Instance level.

Feature

R Integration ... Create a decision tree based on machine learning analysis in the R platform, using historical GideonSoft data.

The redesigned Band Report, set up as a voting tool!

Organization Dashboard Updates

Change

Stacked Bars ... The Bar Chart item now has an option to display stacked bars, as values or as a percentage.

Feature

New Comparison Widget ... Compare status counts in current vs. historical Instances.

Miscellaneous Improvements

Change

Name Format ... A new global setting to display people using their full Name or their assigned identifier. Instance Home page, Survey and Observation selection lists, and elsewhere throughout GideonSoft.

Feature

Quickly Broadcast a Question ... Select who to ask, type your question, provide possible responses, set an expiration and send. The question appears on the timeline for the selected people to respond. You see results on your timeline as they come in.

The screenshot displays the 'Broadcast' interface for creating a question. On the left, the form includes options to 'Send a message' or 'Ask a question', a selection for the instance (2020), role (All Players), and recipient(s) (All selected (31)). The question text is 'What workout should we do today?' with 468 responses. Possible responses are listed as Strength - Upper body, Strength - Lower body, Cardio, and Off day. An expiration of 1 week is set. A 'Post!' button is at the bottom.

On the right, a preview of the question shows a pie chart with 20 responses. The chart data is as follows:

Response	Count	Percentage
Strength - Upper body	13	65%
Strength - Lower body	3	15%
Cardio	3	15%
Off day	1	5%

Broadcast a question quickly and easily!
