

# What's New in GideonSoft 2024 Release 3

We're happy to introduce the latest GideonSoft release! Along with performance enhancements, stability improvements and bug fixes, we have added some exciting new designs and features.

## New Advanced Reporting and Dashboard Design tools!

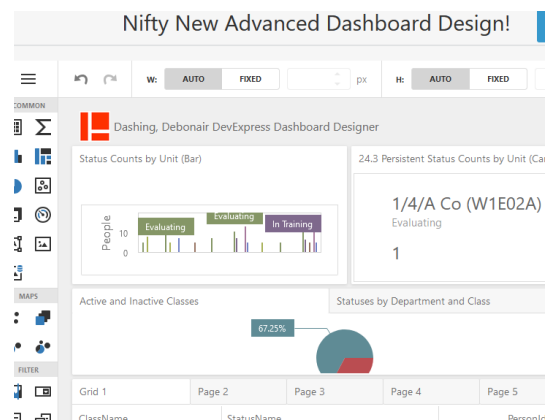

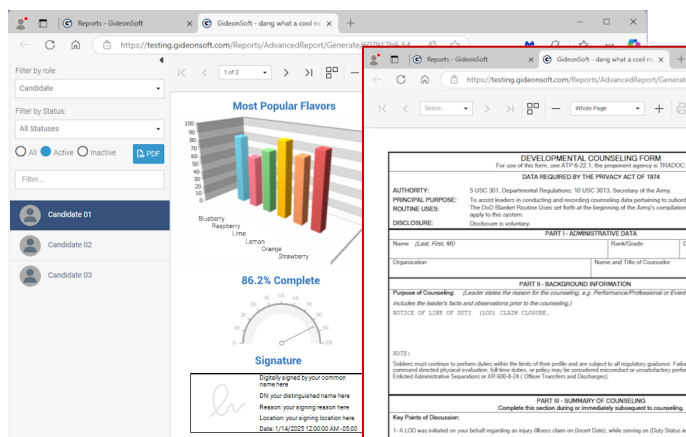

We've added a whole new set of report and dashboard types, available throughout GideonSoft ...

**Feature**

**A Whole New Kind of Report!** ... Advanced Custom Person and Custom Group report types can be used to create detailed reports and complex data presentations, with a wide range of formatting and drill down options. You can also recreate custom reports to precisely match existing forms if needed. Available at Org, Persistent Module, Performance Module and Instance levels.

**Feature**

**A Whole New Kind of Dashboard!** ... Use the new Advanced Dashboard type to present interactive, real time data visualizations with charts, grids, maps, gauges and pivot tables.

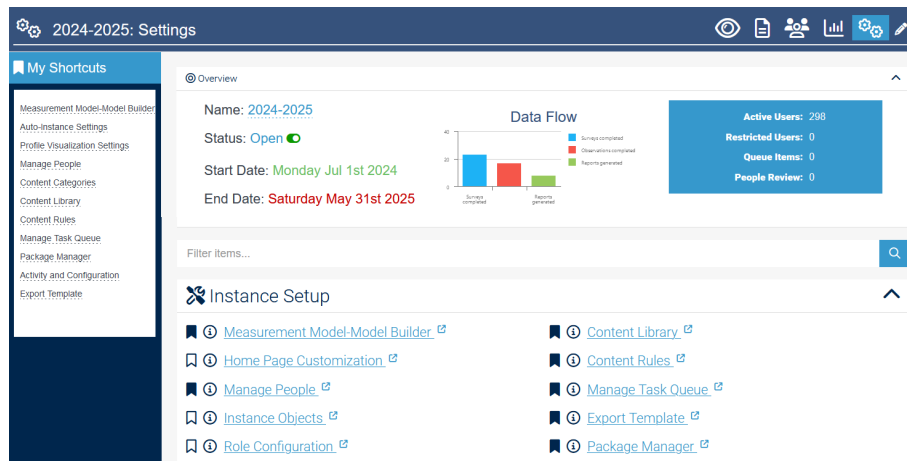

Leverage the DevExpress platform for detailed reporting (L) or real-time monitoring and data exploration (R)!

# A Whole New Instance Settings Look and Feel

The new interface includes ...

- Completely redesigned Instance settings UI, making it easier to find what you're looking for.
- High-level Insights data to quickly gauge activity Instance-wide.
- Shortcuts! To locate and knock out tasks you need to get done more quickly.
- Updated Instance-level QA reporting.

*Your Instance has never been so organized or informative!*

## With Great Persistence Comes Greater Visibility

**Change**

**More Tools & Visibility for Overlords ...** In Persistent Module settings, Overlords now have access to Module In-Processing settings, to see and manage the process of adding people. To help with troubleshooting, Overlords also now have access to System Logging.

**Feature**

**New Activity Viewer ...** View and search activities, and see who's available and who's busy.

**Design**

**Advanced Reporting ...** In case you missed the first part above, there are some nifty new, advanced new reporting tools available in the Persistent Module!

## Other Miscellaneous Goodness

---

### Change

**Enforce the 'My People' Filter ...** Previously, an admin could make a 'My People' filter available to users in a designated role when they view surveys, reports, the home page, etc. Now, an admin can enforce this 'My People' filter (i.e. not an option).

### Change

**Refined Status Rules ...** We added an option in status rules to ignore archived people when processing the rule.

### Change

**Control of Attachments ...** Instance-level attachments and categories can ONLY be created by Overlords and above.

### Change

**Feedback Rule Notifications ...** When a new Instance is created, Feedback Content Rules now include email notification settings in the transfer process.

### Feature

**Custom Support Link ...** You can display an additional support link on the sign in page, and now customize the displayed text and the URL.

### Feature

**Improved Security ...** Admins can allow their people to use Google Authenticator for multifactor authentication, and now can disable this functionality for a user (to help troubleshooting).

### Design

**Know Your Team ...** When editing teams, the current team label is now displayed at the top.
