

# What's New in GideonSoft 2025 Release 1

Introducing the latest GideonSoft release, including security enhancements, performance improvements and bug fixes, and some exciting new features, especially for those who need to go mobile ...

## Time to Go Mobile!

The GideonSoft mobile app was completely redesigned and rebuilt, top to bottom!

### Change

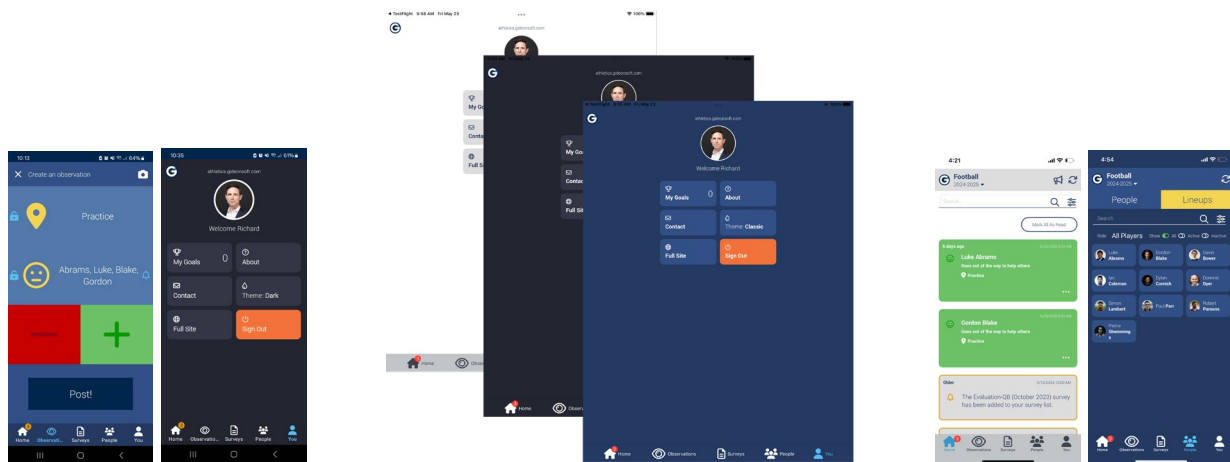

**A Whole New Engine Under the Hood** ... To improve performance and security, we replaced & upgraded the mobile app platform completely.

### Feature

**New Survey Design Options** ... We added the ability to display multiple questions per page, giving you more layout flexibility.

### Design

**Updated Look and Feel** ... We redesigned the UI for more intuitive (but familiar) user experience and updated the look & feel, including themes.

*Androids and iPads and iPhones ... oh my!*

## Making the Admin's Job Easier

### Change

**More Powerful Search** ... Even within an Instance, you can perform a global search (with appropriate permissions of course). And, global searches now include Persistent Module profiles that don't have a GideonSoft account.

### Change

**Stay in Sync** ... As part of the nightly maintenance process, GideonSoft now automatically syncs custom fields.

### Change

**More Straightforward Module Setup** ... One less step: Give it a name, select which type and off you go.

### Feature

**Talk about a Power Grid** ... In the Instance People page, you can now easily add global profile and global custom fields. AND... you can edit field values directly in the grid!

### Design

**Levelled-Up Statuses** ... Managing Status Definitions just became much quicker and easier, with more information visible.

People: Status Definitions									
<div>            Drag a column header here to group by that column       </div> <div> </div> <div> <input type="text"/> Search...       </div>									
Name ↑	Code	Available Tags	Assigned Users	Rule Count	Preview	Is Active?	Shown on Home Page?	Is Archived?	
<a href="#">Dismissed</a>	DIS		0	0	Dismissed	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	⋮
<a href="#">Inactive</a>	IA		0	0	Inactive	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	⋮
<a href="#">Not So Sure</a>	NSS		0	0	Not So Sure	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	⋮
<a href="#">Present</a>	P		397	0	Present	<input checked="" type="checkbox"/>	<input type="checkbox"/>		⋮
<a href="#">Present But Not Accounted For</a>	PBNAF		24	0	Present But Not...	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>		⋮
<a href="#">Super Special</a>	SS		38	0	Super Special	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>		⋮

*It's so much easier to check the status of your Statuses!*

# More Options for Report Design and Delivery

Change

**More Data Source Options** ... 'Roster' is now available as a data source for the Detail Data Grid and Pivot Grid report items.

Change

**More Date Range Options** ... We've added more choices to the Date Range parameter.

Change

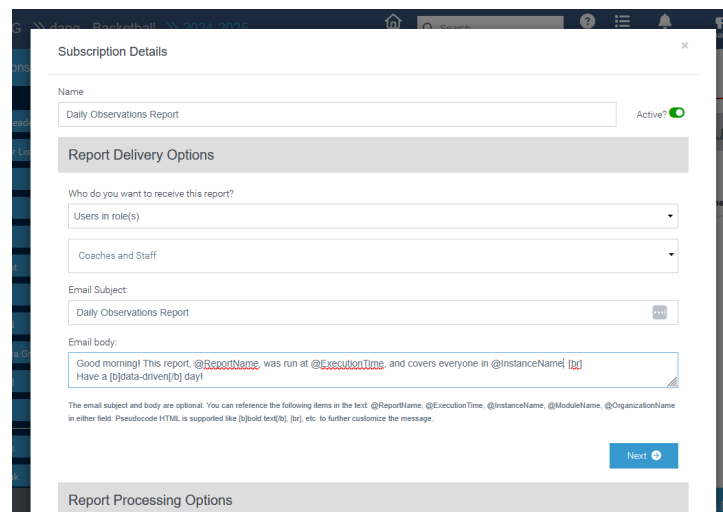

**More Subscription Target Options** ... Specify target objects for Custom Person report subscriptions.

Change

**More Detail on Subscription Activity** ... On the "Activity - Reports" built in QA report, you can now see the configured subscriptions as well as the activity history.

Design

**More Subscription Formatting Options** ... Don't forget you can embed 'pseudo HTML' in the email body!

**Subscription Details**

Name: Daily Observations Report Active 

**Report Delivery Options**

Who do you want to receive this report?

Users in role(s) 

Coaches and Staff 

Email Subject: Daily Observations Report 

Email body:

Good morning! This report, @ReportName, was run at @ExecutionTime, and covers everyone in @InstanceName! 

Have a [b]data-driven[br] day!

The email subject and body are optional. You can reference the following items in the text: @ReportName, @ExecutionTime, @InstanceName, @ModuleName, @OrganizationName in either field. Pseudocode HTML is supported like [b]bold text[br], [br], etc. to further customize the message.

**Next** 

**Report Processing Options**

*Who doesn't want more options?*

## Other Miscellaneous Goodness

---

### Change

**Picture This** ... You can now attach images when recording observations in a web browser (just like in the mobile app).

### Change

**Allow Users to Edit Selected Fields for Themselves** ... At the org level, you can choose to allow self-viewing and self-editing on a field-by-field basis.

### Change

**Better Quality Assurance Reporting** ... All 25 built-in QA reports were updated and expanded. We were on a roll, so we even added a new Org report. (on Settings pages, look under 'Activity and Configuration')

### Change

**Updated File Attachment List** ... We fixed a minor typo regarding acceptable file types on attachment screens, such as Global profile, Instance profile, Persistent Module Activities or Attachments. (Nothing against 'jpeg' files; either .jpg or .jpeg could always be uploaded.)

### Feature

**NEW! GideonSoft Support site Chatbot** ... When you sign in to [Support.GideonSoft.com](https://support.gideonsoft.com), a helpful chatbot can get you answers quickly. Look in the lower right part of the page and give it a try!

### Design

**Updated Persistent Module Insights** ... In Persistent Module settings, the Insights panel was updated with more pertinent data.
